AGRICOLA HARRISON

Organic Growers

Mallarauco Valley Since 1987

AGRICOLA HARRISON

Who We Are...

Sociedad Agrícola Harrison has a long-standing track record, dating back to 1987, when we began conventional farming and continuously improved the quality of our oranges and lemons from Mallarauco Valley. In 2014, we transitioned to organic orchard production, certified by Ecocert under Chilean standards. We are not currently certified, but we can provide guidance on obtaining organic recertification. We have 30 hectares planted, 15 hectares available for planting, and 45 hectares of ecological reserve, in keeping with our commitment to organic-quality production.

Main Crops

Oranges

Varieties

- Spring Navel
- Fukumoto
- Olinda Valencia or Late Valencia
- Lane Late

New Crops

- Prickly Pear and Nopal Cactus

Lemons

Variety

- Genova on Macrophylla Rootstock

Avocados

Varieties include

- Hass
- Bacon
- Edranol
- Sutano

AGRICOLA HARRISON

Organic Certification

As organic growers, we were certified by Ecocert, one of the world's leading certification bodies. Our organic journey began in 2014 and our Ecocert certification under the Chilean standard remained in place until December 2025. This standard is recognized as equivalent for Europe, and our certification also included an annex for exports to Brazil. The process was overseen by Chile's Agricultural and Livestock Service (SAG), which audited us in addition to Ecocert. We can provide guidance on obtaining organic recertification and regaining these benefits.

This certification covered our 30 productive hectares, comprising 17.5 hectares of lemons, 8 hectares of oranges, 2 hectares of avocados, and 2 hectares of prickly pears. We were also in the process of adding native species such as quillay, nettle, and others to our certification. These would allow us to produce organic inputs for natural pest management.

Main Equipment

Our packing area is equipped with the following:

- Yale/Toyota LPG Forklift
- Tractors
  - Massey Ferguson 374 / Landini Orchard Tractor, 4WD
  - Massey Ferguson 265, 4WD
- Two grading machines, one with a bin tipper
- Mist blower
- Sprayers: one large and one small
- Digital platform scale
- Bin trailer
- Wood chipper

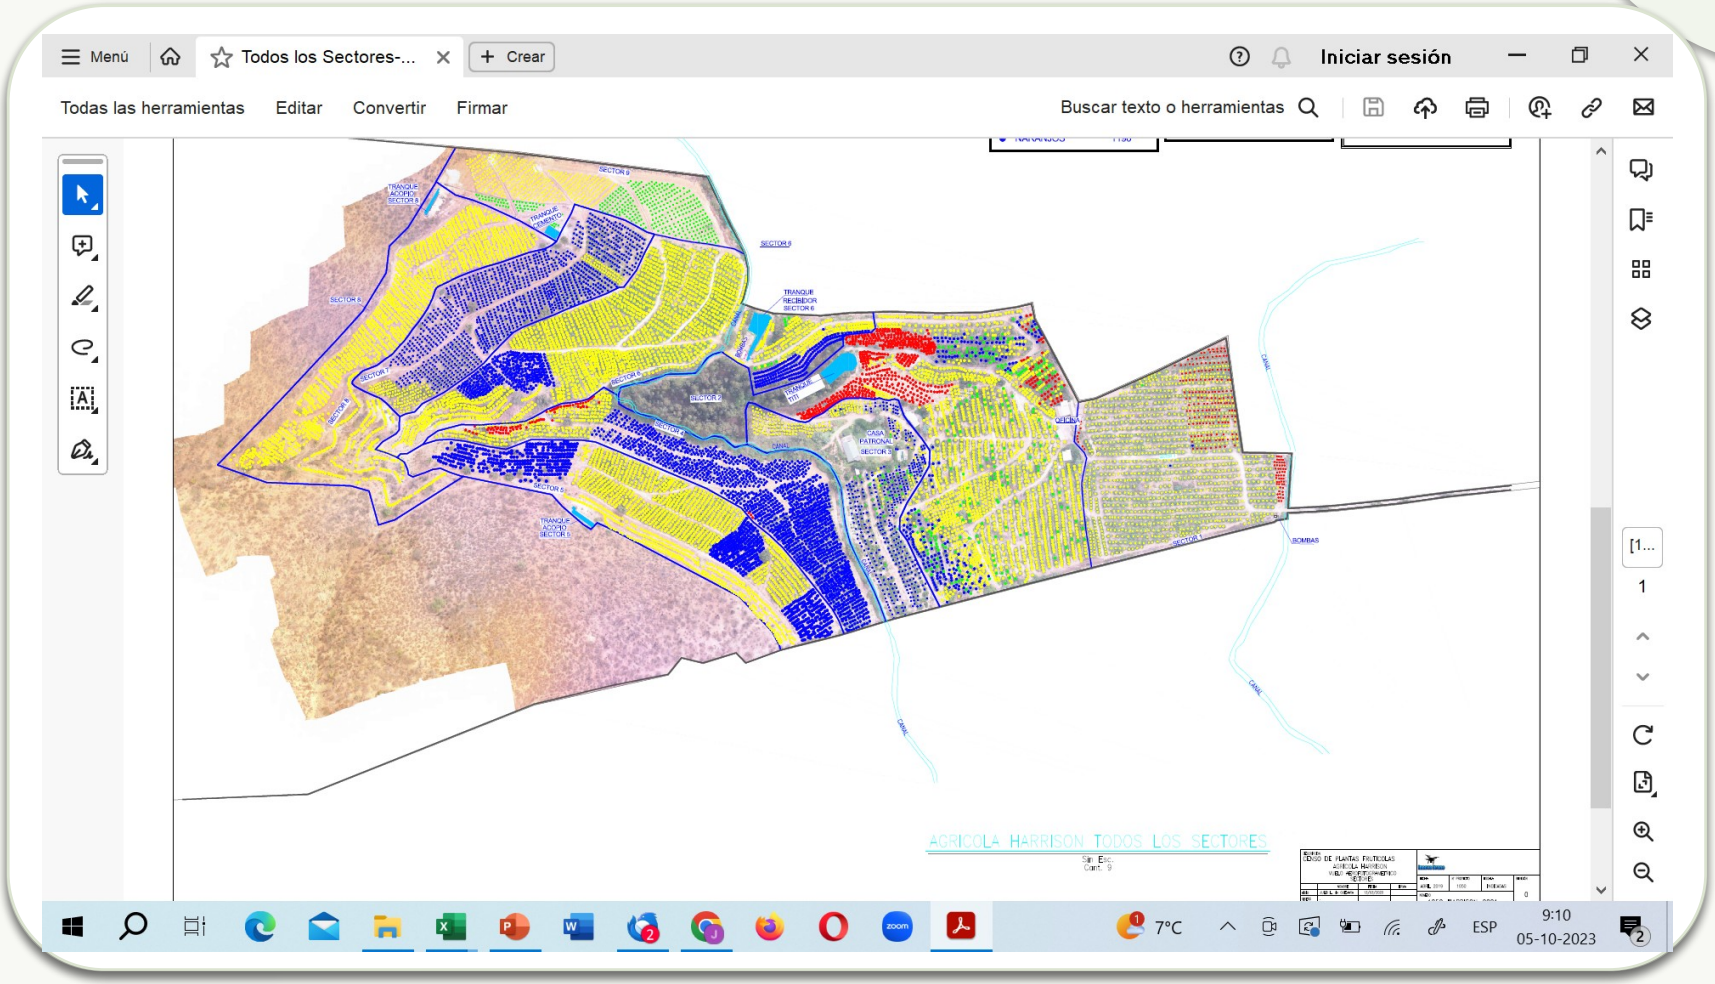

Please note that the packing and loading area has recently been paved.

Office and Irrigation Infrastructure

The company has the following facilities:

- Three residential houses
- Meeting room
- Administration office
- Production warehouse
- Supplies warehouse
- Pump room with two booster pumps and one backup pump
- Drinking water booster pump room
- Water reservoirs:
  - Receiving reservoir
  - Four storage reservoirs
- Three irrigation pump stations
